

Langston

Just about every day we hear from people who had no idea that we manufacture replacement parts for Langston equipment.

The fact is we carry thousands of parts for everything from the JP rollstands, the Saturns, all the way to the XD Singlefacer and lots in between! Many of which are in stock, and priced below the competition.

They also didn't know that we perform complete rebuilds on the machinery as well!

Langston Saturn III heading back to the customer after a complete rebuild by the Corrugated Gear ReGeneration team. (above)
