REBUILD

(770) 475-8929

cgsparts@corrugatedgear.com

The pages ahead showcase just a few of the rebuilds we've performed for the various machines throughout the corrugated industry, something we refer to as ReGeneration.

noun / re-gen-er-a-tion

A series of processes performed by experienced technicians that generate new life into old and worn out (lifeless) machinery placing it back into better than new condition in many cases.

Corrugated Gear and Services, Inc. has been in business for over 30 years, has specifications for over a half million different parts, and is recognized as a leader in rebuilding and restoring corrugated machinery.

It all comes down to this...
