

IMPROVEMENTS FOR WARD FLEXO FOLDER/GLUERS

AXIAL FOLDING CONVERSION*

- Improves Folding by providing positive pressure on the score line throughout the folding process.
- Easy height adjustment for ALL flutes!

*Patented

SPLIT SLOTTER ADJUSTING GEAR

- Change worn gears *and* wear plates without removing the slotter shafts!
- ← One piece gears are still available

REPLACEABLE / "SHIMMABLE" WEAR BUTTONS*

- Carbon Pads can be replaced at a significant savings over buying the OEM button.
- Carbon buttons can be shimmed for a perfect fit, increasing the life of the slotter knife.

*Patent Pending

SPLINED REGISTER FRICTION LOCK CONVERSION

- Permanently reduces backlash to "zero".
- Can be used on keyed and splined register hubs!
- 1/3 the cost of new journals and hubs.

*Patented

SUPERSCORE*

- Significantly lowers incidence of rolled scores.
- Improves stacking strength and compression.
- Works well on ALL flutes "E" thru "AAA".

EPICYCLIC HEAVY DUTY REGISTER

- Long lasting performance without costly monthly maintenance.
- Highly accurate registration with digital encoder and readout!

FRICTION LOCK CONVERSIONS

- Designed for gears and constant mesh assemblies.
- Can be used on existing keyed and splined shafts and journals.
- Eliminates keyway play for the life of the part!
