

Dual Gearbox Double Backer Drive Conversion

This conversion offers the following advantages:

- Increased torque available to run at higher speeds
- Easily handles increased horsepower requirements of the various heat transfer systems
- Includes new 200 h.p. drive motor that connects to your existing main drive package
- Eliminates Bull Gears
- Reduces noise
- Eliminates gear oil & associated mess
- Our conversion drives the upper and lower drums through two heavy-duty spiral bevel gear boxes. The drive is transferred directly to your drum journals with universal couplings for ease of installation.
