

LOCK IT UP & RELAX...

IT'S NOT GOING ANYWHERE

Wouldn't it be nice if all of the sections of your machine would fit together tightly... all of the gears meshing together perfectly? Just think of how wonderful it would be if there was a device that could actually lock your entire machine together and hold it in place securely from one location. Well, there already is...and it's from CORRUGATED GEAR AND SERVICES, INC.

Our FEED END FRAME LOCKS are designed to fit all of the big names such as KOPPERS, HOOPER, HOOPER-SWIFT, LANGSTON, S&S, and WARD just to name a few.

So *Lock It Up* and stop worrying, with a FEED END FRAME LOCK... from the Leaders of Innovation at CG&S!

- ELIMINATES EXCESSIVE MACHINE VIBRATION
- REDUCES PRE-MATURE GEAR WEAR
- HELPS CONTROL OIL SEEPAGE BETWEEN SECTIONS
- QUICK AND EASY TO INSTALL AND USE
