

IT'S LIKE NOTHING EVER HAPPENED...

In 1985, hard times brought an end to one of the world's best known manufacturer's of quality built corrugated machinery.

End of Story? **NO WAY!**

Corrugated Gear and Services has been gradually "stoking the fire" as the OEM for S&S parts for many years now, and has recently acquired the additional rights to manufacture a completely new machine, as well as individual sections for existing S&S equipment.

And if Re-Building your older S&S machine sounds better than buying something new right now, there's no one better qualified than us!

Since we are the manufacturing facility as well, we're able to work with our team of engineers to develop new and exciting solutions to yesterday's technology. (Epicyclic Registers, Friction Locking Conversions, Axial Rod Folding Conversions, etc...)

What this means to you is better performance, greater savings and extending the life and traditions of a true American workhorse.

S&S MAY BE OUT OF BUSINESS, BUT THE HEART AND SOUL STILL LIVES ON AT CORRUGATED GEAR AND SERVICES...

ALMOST AS IF NOTHING EVER HAPPENED!
